# DRINKING WATER ANALYTICAL SERVICES

## ABOUT ENCO

---

Environmental Conservation Laboratories, Inc. (ENCO) is an analytical laboratory company with over 80 employees operating laboratories in North Carolina and Florida since 1988. In 2005, Chemical and Environmental Technology (CET) joined the ENCO laboratory network. The ENCO and CET Cary operations were subsequently merged into the 12,000 sq ft laboratory facility located near RTP at Woodwinds Industrial Park in Cary, NC.

We maintain certifications for the analysis of drinking water for both bacteriological contaminants and a wide array of primary and secondary inorganic and organic parameters. With an average employee experience level of over 10 years, ENCO prides itself on the expertise of its team members.

ENCO is certified by the States of NC, VA and FL NELAP (National Environmental Laboratory Accreditation Program) to analyze drinking water, municipal and industrial wastewater, soil, groundwater, and hazardous waste.

## COMPLIANCE WITH DRINKING WATER RULES

---

ENCO is thoroughly familiar with State and National requirements for DW Compliance Monitoring. We maintain the laboratory capacity and technical capabilities to assist you with your monitoring program needs.

- **Arsenic**
- **Bacteriological - Total Coliform, E. Coli, Heterotrophic Plate Count HPC**
- **Disinfection By-Products - DBPs (THMs & HAAs)**
- **Lead and Copper Rule**
- **Inorganic Chemicals**
- **Nitrate/Nitrite, Turbidity**
- **Surface Water Treatment Rules (SWTR, IESWTR, LT1ESWTR, LT2ESWTR)**
- **Synthetic Organic Chemicals (SOCs)/Pesticides, PCBs & Dioxin**
- **Asbestos and Radionuclides**
- **Volatile Organic Chemicals (VOCs)**
- **Unregulated Contaminant Monitoring Rule (UCMR)**

## SAMPLING SERVICES & CUSTOMIZED CONTAINER KITS

---

We maintain a staff of trained field technicians equipped to perform EPA and State field sampling protocols. Additionally, we provide scheduled courier services and arrange for sample kit delivery to your door via commercial carrier.

ENCO always provides easy-to-follow instructions along with your customized sample bottle kits. Your bottle kit arrives with pre-printed labels and chain-of-custodies, and the proper preservatives. The result is time-savings for you, and the assurance that your samples will be collected and preserved correctly so that costly re-sampling and re-analysis is never needed.
